

GladRags Sustainability Pledge

GladRags is in the business of reducing our negative environmental impact on the Earth. But it isn't just what is sold at GladRags that makes us environmentally-friendly, it's how we operate the business as well.

We want to share with you some of our commitments to sustainable business practices:

For Our Customers

- * Provide organically-grown cotton GladRags pads
- * Source conventionally-grown cotton from local fabric suppliers
- * Print on 100% post consumer paper
- * Manufacture GladRags locally to reduce transportation emissions
- * Sell reusable, rather than disposable, products and/or naturally derived products
- * Promote healthy, conscientious living through our products, blog, newsletter and website

In The Office

- * Compost all organic office waste
 - * Recycle all paper, aluminum, plastics and glass
 - * Refill printer ink cartridges rather than purchase new cartridges
 - * Purchase surplus boxes for shipment (this also saves GladRags money)
- * Reuse all shipping packaging that we can

We make it a top priority to seek a lighter footprint in how we operate GladRags. If you have any suggestions for additional steps that we can take to become more sustainable, please contact us.

Here are some links that can help you get started on your personal sustainability:

Composting Information

Ink Refilling

Far West Fibers (for Portland locals only – they recycle everything!)
