Colorado Springs, CO; March 27, 2017 – Folium Biosciences, a manufacturer and distributor of wholesale business to business high quality cannabinoid-rich hemp products, will launch a new line of Hemp Horse Pellets at the NoCo Hemp Expo on March 31 and April 1 in Loveland, CO at **Booth #11**. The new equine products will be launched through Folium Biosciences Animal Health Division.

The Hemp Horse Pellets were tested in independent trials by equine veterinarians who found that horses benefited from the low dose cannabidiol (CBD) found in Folium Bioscience’s Colorado grown hemp. The pellets were formulated by Folium’s Chief Veterinary Officer, Dr. Robert J. Silver. Folium pellets contain protein, fiber, amino acids, and 25mg of CBD in each 3 tablespoons which has been found to be an effective amount when administered twice daily. Folium Hemp Animal Pellets are available in 2.5 pound bags and 50 lb bulk sacks.

“We are pleased to be entering the equine market and providing horse owners with powderized and pelleted hemp material that will be easy to give to horses and improve their health,” said Dr. Silver. “The hemp plants were naturally bred over eight years to produce a superior, diverse and unique phytocannabinoid and terpenoid profile. These pellets can also be adapted for goats, sheep, swine, llamas, rabbits, and pocket pets,” added Dr. Silver.

About Folium Biosciences Inc.

Folium Biosciences is a privately held bulk and wholesale Business to Business (B2B) distributor of the highest quality organic medicinal hemp CBD derived phytocannabinoids in the world. Entourage Nutritional is the exclusive distributor to Folium Biosciences Inc. In addition to the domestic medicinal hemp that Folium Biosciences and Entourage Nutritional currently distributes, Entourage Nutritional also distributes imported European (EU) certified industrial hemp. All products distributed by Folium Biosciences and Entourage Nutritional are tested both internally and independently for potency, purity, and consistency. Folium Biosciences produces only the highest grade products that are organic, contain no pesticides, no residual solvents, no heavy metals, and no toxic mildew or mold. All products distributed are tested internally as well as independently by 3rd parties to confirm and maintain full accuracy and consistency of all quality control measures. All phytocannabinoid (PCR) rich products the company produces, manufactures, or distributes, are either imported legally, or derived from 100% Federally legal industrial hemp that is registered with the Colorado State Department of Agriculture and conform fully to the 2014 U.S. Farm Bill section 7606 which federally legalized the cultivation of industrial hemp under certain federal mandated conditions which Folium Biosciences and its farming and distribution partners and suppliers conform to fully. All products Folium Biosciences and Entourage Nutritional Distributors produces, manufactures, markets, or distributes, are fully compliant with all 50 states, local, and international laws.
